Ed, Chastain's "eggs and sausage man" appears to be the real Youn
blood who from my own sources was then arrested. I have spoken to
his lawyers. However, anything really connecting him with the Kin
job I do not know. You will notice that as this point Chastain
conjectures about the possible political orientation of conspira-
tors, I believe without maturity. He also omits part of what he
told me about McFerren-that the FBI broke his (implausible)
story down. Glad to get and read. Less rabid than usual stuff in
Computers. But all theorizing without basis for it. There are
a few minor errors. And there is much more he can say and has
not about Youngblood and his Memphis connections. There is nothin
new in this to me yet but maybe there will be. Thanks, best,
